With an ORAC value of 43,064 per daily ration (33 ml), VABO-N ESSENTIALS is one of the so-called super antioxidants and protects our body cells daily from free radicals, stress and environmental influences.

12 VITAMINS

Vitamins are essential substances that the body must take in daily through food, as it cannot produce them itself. VABO-N ESSENTIALS contains 100% and more of the recommended daily requirement of 12 vitamins. Our vitamin D3 is extracted from lichen to satisfy vegan requirements.

MINERALS & TRACE ELEMENTS

VABO-N ESSENTIALS contains the naturally occurring spectrum of more than 70 minerals and trace elements in ionic colloidal form, just like a construction plan for a successful life. The herbal origin ensures optimal absorption by the body.

ACEROLA

This fruit from South America has one of the highest contents of vitamin C of all fruits. It also scores with provitamin A, vitamins B1 and B3 (niacin), and the minerals iron, phosphorus and calcium. By the way, the acerola is not related to the cherry, even though it looks quite similar.

MANGOSTEEN

The mangosteen is a fruit that has been used in Ayurvedic teachings in Southeast Asia for centuries. It is rich in xanthones, powerful secondary plant compounds that are increasingly attracting the interest of Western science and medicine for good reason. It is also called the "Queen of the fruits".

ALOE VERA

Aloe barbadensis Miller has been prized for its valuable ingredients for thousands of years and is often referred to as the world's smallest medicine cabinet. The pure inner leaf gel of organically grown Fairtrade *Aloe barbadensis Miller* is used in VABO-N ESSENTIALS.

RESVERATROL

New studies on the positive effects of resveratrol are published daily. Its many positive properties are due in part to its polyphenols. Laboratory tests suggest that resveratrol activates longevity genes. Our resveratrol comes from Japanese knotweed.

Note on product advertising text according to the European Health Claims Regulation: For example, vitamins A, C and D and zinc contribute to the normal function of the immune system. Zinc contributes to the maintenance of normal skin, hair and nails, as well as to normal carbohydrate, macronutrient and fatty acid metabolism. Zinc also contributes to the protection of cells from oxidative stress. Zinc contributes to normal fertility and reproduction. Vitamin D contributes to the maintenance of normal bones and normal teeth. Vitamin A and zinc contributes to the maintenance of normal vision. Niacin contributes to the reduction of tiredness and fatigue, to normal functioning of the nervous system and energy-yielding metabolism and to normal mental function. Pantothenic acid contributes to normal mental performance. Thiamine contributes to the normal function of the heart. Selenium contributes to normal spermatogenesis.
